

INTRODUCTION:

This is a magical procedure in which a small quantity of Platelet rich plasma derived from your own blood is injected strategically into your breasts to stimulate growth of new fatty tissue for smoothness, and new blood vessels for a healthy glow.

This results in fuller, firmer, younger breasts with pinker, rejuvenated ,more sensitive nipples

WHO MAY BENEFIT FROM THIS PROCEDURE?

- 1.If the skin color of the breast has become more gray because of less blood flow .
- 2.If the shape of the breast has become collapsed and droopy.
- 3.If the sensation has decreased after breast-feeding ,implants ,or other surgery ,or due to age.
- 4.If you have Inverted nipples.
- 5.If you have crinkling of the skin in the Cleavage area (especially after implant surgery)

HOW IS THE VAMPIRE BREAST LIFE DONE?

- 1.It is a 20 minute office procedure in which a small quantity of your own blood (the same amount as would be drawn to do a basic blood test)is taken from your arm.
- 2.It is then spun in a special centrifuge machine to separate the platelet rich plasma that contains a high concentration of 8 growth factors
- 3.A local anesthetic cream is applied to your breast on both sides for 20 minutes.
- 4.This Platelet rich plasma activated with calcium chloride is injected strategically into your breasts and under the nipple area painlessly with a tiny needle.

Dr. Mazhar G. Nawaz and Seemi Nawaz , CEO pictured here with Dr . Charles Runels, inventor of Vampire Breastlift.

Dr. Nawaz is one of the most experienced surgeons in the greater Orlando area and surrounding counties, having performed several thousand procedures over his long and distinguished career. He is a fellow of the American College of Surgeons, a fellow of International College of Surgeons, as well as Certified by the American Board of surgery. He has practiced medicine and surgery for more than 46 years in the United States and has been practicing in the state of Florida since 1976.

Dr.Nawaz has held positions Chief of Surgery, Professor of Surgery, and Director of Postgraduate Institute at a University. He received one on one training from Dr.Charles Runels (The inventor of Vampire procedures) about the art and Science of Vampire facelift, Breast lift, O-Shot and P-Shot.

HOW LONG WILL IT BE BEFORE I SEE RESULTS?

You will see improvements immediately although there is usually a return for the prior status in 3 to 5 days as the water is absorbed and the swelling subsides.

The cellular regeneration process starts and within 2 to 4 weeks you will see improvement with actual growth of new tissue stimulated by the Uni potent stem cells.

ARE THERE ANY RISKS OR SIDE EFFECTS?

Since all the constituents retrieved in the PRP are exclusively from your own blood (Autologous in origin) there is no risk of an allergic reaction or intolerance ever reported in the literature in several thousand papers written on the subject. The problem most often is the loss proper shape of the breast and drooping after breast-feeding.

A surgical breast lift relocates the nipple to a higher position in the breast but this often results in numbness or decreased sensation in the nipples. Also, there is no volume added to the cleavage area. After vampire breast lift, there is an immediate increase in the size of the breasts especially in the cleavage area. The full effect however takes 6 to 8 weeks.
